Limpieza Purotecnica S.A.
"Underwater Cavi-Jet Cleaning"

The newest underwater cavi-jet cleaning **equipment** is used on flat surfaces, curved and hard-to-get places.

The **results** are impressive:

- treated surface is completely clean
- no paint damage
- high productivity
- ecological safety
- safety for divers

EXPERTS REFERENCES:

"We confirm that after the demonstration of the underwater Cavi-Jet Cleaning Equipment, presented by Limpieza Purotecnica S.A. ... we found the equipment very efficient, fast working and reliable." - **Alldiver Ltd, Malta**

"Conducted works have demonstrated both efficiency and superiority of the cavi-jet technology and equipment... The demonstrated technology differs from conventional ones by its high labor productivity, easy maintenance, ecological purity and high quality." - **OASIS Ship Management LLC, UAE**

"We used the Cavi-Jet systems ... and found this equipment to be extremely effective against hard and thick fouling ... and environmentally friendly. This equipment is quite effective in cleaning hard-to-get places, as well as huge flat areas." - **Willarden Corp., USA**
